

# Technical Information

## 20U-23/20U-25

### 2K Urethane Primers

A brand of  
BASF - We create chemistry

## Process for Urethane Primers

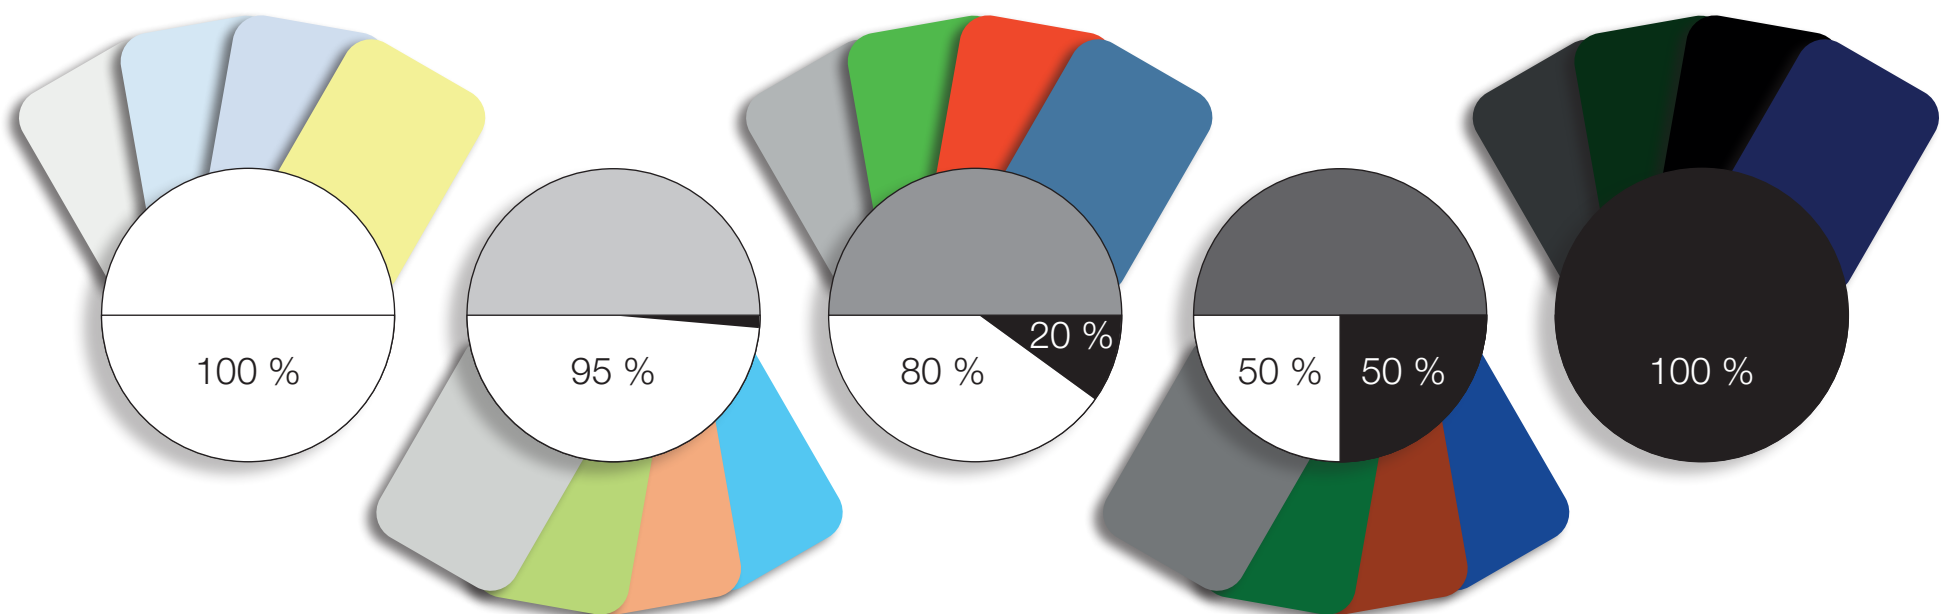

- Good filling properties, quick drying, good melt-in, excellent adhesion and topcoat holdout for either primer surfacer or sealer applications

## 1. Mixing of primer for correct undercoat solution

(can be mixed with each other as shown in the mixing table)

Undercoat solution / Mixing ratio % by vol.	20U-23 White	20U-25 Black
White	100 %	
Light grey	95 %	5 %
Grey	80 %	20 %
Dark grey	50 %	50 %
Black		100 %

As a primer surfacer, our 20U-23 and 20U-25 2K Urethane Primers offer quick cure, sandability that provides good sand scratch filling with excellent adhesion and topcoat holdout.

As a sealer, our 20U-23 and 20U-25 2K Urethane Primers are performance sealers that provide good filling properties and quick drying with good melt-in and topcoat holdout.
